NINLARO® (ixazomib) Package Opening Instructions

Uses of NINLARO

NINLARO is a prescription medicine used to treat multiple myeloma in combination with the medicines REV Lima® (lenalidomide) and dexamethasone, in people who have received at least one prior treatment for their multiple myeloma.

It is not known if NINLARO is safe and effective in children.

This pamphlet contains step-by-step instructions for handling your NINLARO package and capsules. You can also watch a video on how to handle the NINLARO packaging and capsules at TakingNINLARO.com.

1. Before you can open the package, be sure to push the medication card all the way into the sleeve to help with the release. NINLARO is also available in 3-mg and 2.3-mg dosing strengths.

2. Press in with your thumb to release the locking mechanism.

3. While pressing in with your thumb, pull out the medication card using the thumb and index finger of your other hand.

4. Gently push the capsule through the foil.

5. Avoid direct contact with capsule contents. After you take your medication, wash your hands with soap and water.

SAFE HANDLING PRECAUTIONS

- Do not store above 86°F/30°C
- Do not freeze (32°F/0°C)
- Store at room temperature (69°F/21°C)

Contents of the NINLARO capsule can be harmful to your skin and eyes. Capsule should not be crushed, chewed, or opened. If a NINLARO capsule breaks, avoid contact with capsule contents. If skin contact occurs, wash thoroughly with soap and water. If eye contact occurs, flush thoroughly with water.

Safe disposal—Ask your pharmacist or healthcare team how you should dispose of unused NINLARO. Keep out of the reach of children.

Always store NINLARO in its original packaging until it is time to take it. Remember: NINLARO should be taken at least 1 hour before or at least 2 hours after food. NINLARO should be taken on an empty stomach, so do not take it with food. Swallow capsule whole with water.

Please read the Important Safety Information on the reverse and the Patient Information in the accompanying full Prescribing Information.
Important Safety Information for NINLARO® (ixazomib)

NINLARO may cause serious side effects, including:

- **Low platelet counts (thrombocytopenia)** are common with NINLARO and can sometimes be serious. You may need platelet transfusions if your counts are too low. Tell your healthcare provider if you have any signs of low platelet counts, including bleeding and easy bruising.

- **Stomach and intestinal (gastrointestinal) problems.** Diarrhea, constipation, nausea, and vomiting are common with NINLARO and can sometimes be severe. Call your healthcare provider if you get any of these symptoms and they do not go away during treatment with NINLARO. Your healthcare provider may prescribe medicine to help treat your symptoms.

- **Nerve problems** are common with NINLARO and may also be severe. Tell your healthcare provider if you get any new or worsening symptoms including: tingling, numbness, pain, a burning feeling in your feet or hands, or weakness in your arms or legs.

- **Swelling** is common with NINLARO and can sometimes be severe. Tell your healthcare provider if you develop swelling in your arms, hands, legs, ankles, or feet, or if you gain weight from swelling.

- **Skin Reactions.** Tell your healthcare provider if you get a new or worsening rash.

- **Liver problems.** Tell your healthcare provider if you get these signs of a liver problem: yellowing of your skin or the whites of your eyes; pain in your right upper-stomach area.

Other common side effects have occurred. Tell your healthcare provider if you get new or worsening back pain, lowered white blood cells (neutropenia) that may increase the risk of infection, or vision conditions such as blurred vision, dry eye, or pink eye (conjunctivitis).

These are not all the possible side effects of NINLARO. Talk to your healthcare provider for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.

**Before taking NINLARO, tell your healthcare provider about all your medical conditions, including if:**

- You have liver problems or kidney problems or are on dialysis.
- You or your partner are pregnant or plan to become pregnant. NINLARO can harm your unborn baby. Avoid becoming pregnant during treatment with NINLARO. You and your partner should use effective birth control during treatment and for 90 days after the final dose of NINLARO. If using hormonal contraceptives (for example, the pill), an additional barrier method of contraception (for example, diaphragm or condom) must be used.
- You are breastfeeding or plan to breastfeed. Do not breastfeed during treatment with NINLARO and for 90 days after your final dose of NINLARO.

Tell your healthcare provider about all the medications (prescription and over-the-counter) and nutritional supplements you are taking or before starting any new medicines.

Please read the Patient Information in the accompanying full Prescribing Information.
